

Take your home with you no matter where you are

THE COMPLETE PACKAGE

Security, video and home automation in a mobile, seamless experience.

ALL FUNCTIONS, ONE APP

Control smart security, video and home automation in a single handy app.

QUICK CONNECT

We'll get you up and running in as little as 30 minutes.

UBER FAST, SUPER RELIABLE

Stay in control with a blazing fast connection and always-available communications engine.

MONITORED BY PROFESSIONALS

Working with a pro gives you peace of mind, ensuring someone is there for you when you need it

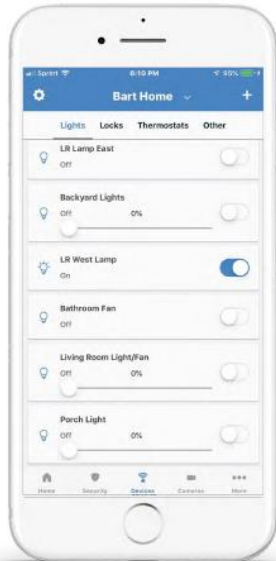

Peace of mind
you can see.
Home and away.

Designed for how you live

Automate your on-the-go lifestyle

Forget to turn the thermostat down before you left? Want the lights to turn on when you arrive? No problem. You can customize connected device actions to match your lifestyle.

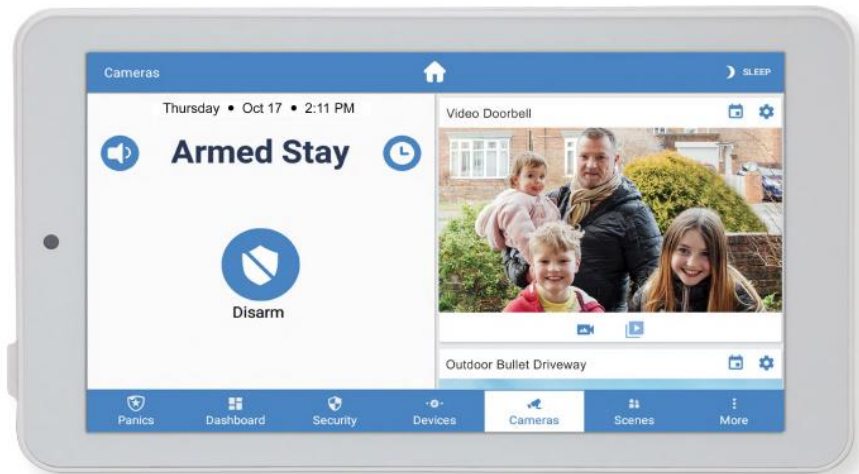

Hack protection

Our network safeguards against hackers. Lockdown encryption keeps your security system and personal data private. We're not listening in like big tech, we focus on the connected devices monitoring your safety.

One is none

Redundant safeguards against power loss or internet interruptions ensures your security is always on when you need it.

Save time with automation

Set up coordinated automation that makes sense for you.

Integrate multiple devices such as thermostats, lights and locks to work in sync with your daily routines, automatically, with a single command.

Stay in control and stay in the loop, from wherever you are.

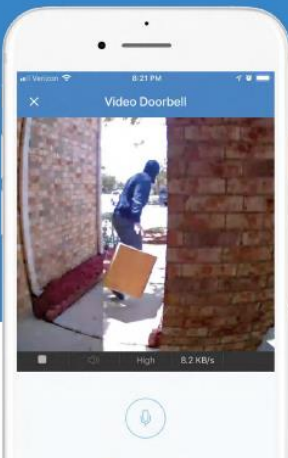

Indoor and outdoor cameras

- Keep an eye on your home, wherever you are
- Secure cloud storage lets you retrieve video from anywhere, anytime
- Instant motion detect notifications sent to your smart phone
- Easy to use, affordable, great for homeowners and renters

Video Doorbell

- See and speak to anyone at your front door
- Press and motion notifications sent to your smartphone
- Records motion-activated clips, view or save anytime
- Deter Intruders

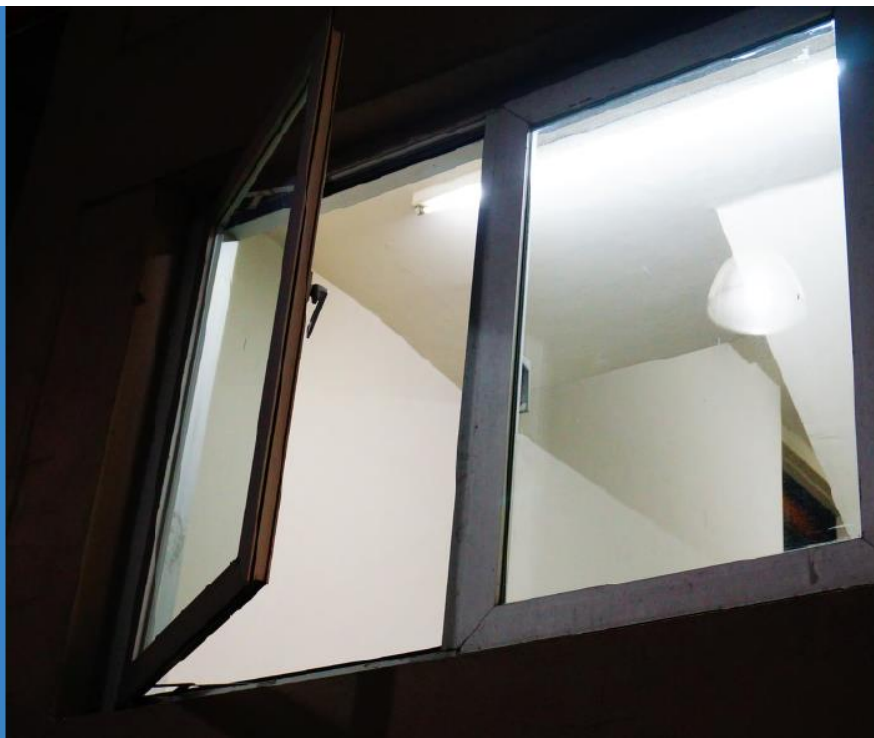

Optional silver or white faceplate to match your trim

Door and window sensors

- Peace of mind, at home and away
- Sensor status in the app shows you if a window or door is open
- Powerful, compact sensors fit discretely in tight spots

Wireless protection and control throughout your home

1. Video doorbell and surveillance
2. Integrated video
3. Detects when doors and windows open and close
4. Lets you know when you've left your garage door open
5. Identifies breaking windows
6. Senses outdoor movement—intruders, not critters.
7. Detects indoor movement—intruders, not pets
8. Smart phone, Alexa or panel controls all sensors, cameras and smart devices
9. Secure encryption
10. Senses fire, carbon monoxide, water and temperature
11. Professional 24-hour monitoring

Indoor motion sensors

- Quickly detects intruders
- Smart sensor ignores pets
- Protection without annoying false alarms

Fire, carbon monoxide and water sensors

- Visible at-a-glance in the smartphone app
- Guard against expensive water damage from frozen or leaking pipes
- Flood and Temp Sensor alerts with any water contact
- Early detection and warning with ultra-sensitive heat, smoke and carbon monoxide alarms

Tilt sensors

- Always know the answer to “Did I close the garage door?”
- Sensor status in the app shows you if the door is open
- Universally compatible with all garage doors

Works with your other smart devices

- Control your entire system from a single device
- Use your smart phone, Alexa, Google or Connect+ security panel
- Use the same app whether you're on your phone, touchpad or tablet
